Xerox Office Products Print Costs

The tables below list the cost per page (CPP) for Xerox office printers using the industry standard measurements of 5% black coverage (a normal black-and-white text page) and 20% cyan-magenta-yellow-black coverage (a normal color page).

Tables on Left (Print Cartridge or ink only¹)

- CPP based only on print cartridges or print cartridge equivalents
- More accurate for low-volume users who may never need to replace any long-life consumables, such as fusers, transfer belts or maintenance kits

Tables on Right (All Consumables²)

- Cost per page based on all consumables, including fusers, transfer belts or maintenance kits
- More accurate for high-volume users who may need to replace long-life consumables

Many competitors publish cost-per-page values based ONLY on print cartridge or ink use rather than on all consumables. Xerox lists both sets of costs so that you can accurately compare products.

Definition: A print cartridge is a supply item that contains both toner and an imaging unit.
